SUMMARY

Data Analyst with technical and marketing background, and the ability to translate complex concepts into actionable insights. Recent hands-on training in SQL, Python, and Power BI through Generation Ireland. Background in technical commercial environments, with experience analysing real-world datasets and producing clear, practical insights. Seeking a data analytics role focused on turning reliable and efficient analysis into tangible business results.

SKILLS

- **Data Analysis:** SQL (joins, aggregations, subqueries), Python (pandas, numpy), DAX, semantic modelling, Excel, business intelligence, revenue and pricing analytics
- **Data Visualisation:** Power BI Desktop and Service, operational and KPI dashboards, data storytelling for non-technical audiences
- **Data Preparation & Modelling:** Power Query, ETL, data cleaning, transformation and validation, data modelling, star schema, snowflake schema, dimensional modelling
- **Reporting & Communication:** Clear and actionable reporting, requirements gathering, portfolio and performance analysis
- **Commercial & Domain Knowledge:** Product lifecycle analysis, forecasting, pricing analytics, process analysis, process optimization

EXPERIENCE

Data Analyst Training Programme, Generation Ireland, September 2025 - November 2025, Ireland

- Completed an intensive, practical training programme in data analysis and visualisation
- Applied Excel, SQL (PostgreSQL / T-SQL), Python, and Power BI in individual and group projects
- Built interactive dashboards to track KPIs using real-time and historical datasets
- Presented findings to non-technical audiences and supported peers with tools and workflows
- Gained awareness of responsible AI usage in data analysis (privacy, ethics, tooling)
- **Built a privacy-by-design ETL and Power BI data analysis pilot for [multi-store car-dealership sales analytics](#)**
 - Ensured PII removal at ingestion using Python
 - Designed a semantic model in Power BI and delivered customer and revenue insights through a scalable, minimal-tool architecture.
- **Created a [fuel consumption tracking tool \(personal data project\)](#)**
 - Analysed real-world fuel consumption and commuting data to identify cost and efficiency trends
 - Cleaned, structured, and analysed datasets using Excel and Power BI
 - Built dashboards and concise summaries to support comparison and decision-making

Senior Sales Manager, Infineon Technologies AG, Denver, CO, USA, November 2023 - July 2024

Manager for the Americas region for two of Infineon's major EMS accounts (\$50M+).

- Successfully navigated challenges posed by customer order cancellations and rescheduling, maintaining steady revenue performance throughout fiscal year
- Demonstrated proactive profit management to prevent price reductions in declining business through strategic measures derived from customer purchasing behaviour and order analysis

Product Analyst, Arapahoe County Government, Littleton, CO, USA, December 2021 - April 2023

Worked at the intersection of digital services and process improvement to modernise operations and reduce friction for residents in a regulated public-sector environment.

- Catalogued and analysed service requests from the building department inbox to identify recurring patterns and improvement opportunities
- Converted paper-based citizen processes into digital workflows using online forms, reducing application time significantly and eliminating manual data entry for county staff
- Conducted a structured audit of software tools across multiple departments to support operational planning

Community Volunteer (Employee Recreation Association), Alice Springs, Australia, March 2020 - January 2021

Supported local community activities during COVID, including basic IT assistance, administration, and coordination tasks.

Product Marketing Manager, Infineon Technologies AG, Munich, Germany, January 2007 - December 2018

- Managed and analysed large product portfolios using market and business data to increase market share
- Supported pricing, product lifecycle, and performance analytics across global markets for efficient cost management
- Designed and worked with KPIs, reports, dashboards, and structured data leading to informed and actionable commercial decisions

Application Engineer, Kodak; Texas Instruments, Munich, Germany, September 2000 - December 2006

- Application-level and product technical support in engineering-led environments
- Led competitor and market analysis to steer headquarters-owned product roadmaps

EDUCATION AND CERTIFICATIONS

Microsoft Certified: Power BI Data Analyst Associate (PL-300 Certification), Expected May 2026

Microsoft Certified: Power Platform Fundamentals (PL-900 Certification), Ireland, November 2025

Data Analytics Programme, Generation UK & Ireland, Ireland, November 2025

Zertifikat Deutsch / telc Deutsch B1 (Note 1), Goethe-Institut e.V., Munich, Germany, April 2006

Università degli Studi di Firenze, Florence, Italy, 1999

MSc in Telecommunications Engineering (5-year Laurea degree, equivalent to combined BSc/MSc - NFQ Level 9)

LANGUAGES

Italian (native), **English** (fluent), **German** (fluent)

INTERESTS

Personal finance tracking and analysis (Excel), home cooking (Italian and international cuisines).
